

Industry Research Collaborations

A review of the peer reviewed research publications that have resulted from researchers' use of the PHRN infrastructure (2010-2015) show some industry collaborations. Between 2010-2015 there were 186 peer reviewed research publications with one or more industry collaborations. Industry collaborations have been categorised as government, non profit and for profit. The majority of industry collaborations are with the government sector which includes researchers who are based in state, territory, Commonwealth Government Departments, agencies or services such as public hospitals.
