

## Core data collections<sup>1</sup> in Australia: Available Years of Data

Snap shot as of 31 July 2018

<sup>1</sup> Core data collections are those that are routinely linked by the Data Linkage Units within the PHRN.

Not all data is available up to the 31st December of the year shown.

This graph is only representative up to the 31st July 2018. Check with the Data Linkage Unit to determine whether more years are available.

<sup>2</sup> In NSW names are not generally available for admissions to private hospitals prior to 1 July 2014 - while the CHeReL is able to link these records based on other demographic details, the linkage is likely to be less accurate. Caution must therefore be exercised in interpreting these results where private hospital data are involved.

In Queensland names and addresses for private patients have been collected from 1 July 2007 onwards
