

Applying for linked data in NT

While each application for linked data is unique, we have summarised the process into a few key steps to assist Researchers.

1

Plan your study

Review datasets via the PHRN or SA NT DataLink website. Discuss your project with the SA NT DataLink staff via email before applying.

4

Submit to the Ethics Committee

Submit SA NT DataLink Letter of Feasibility, data specifications, and HREC application documents to Northern Territory Department of Health and Menzies School of Health Research HREC.

Approval from the Northern Territory Department of Health and Menzies School of Health Research HREC is required for all data linkage projects. NT Health does not accept data linkage projects under NMA.

2

Complete quote or Expression of Interest

Submit quote or Expression of Interest form via the PHRN Online Application System (PHRN OAS). SA NT DataLink will assess the request and if the project is considered technically feasible and feasible within timeframes, issue a Letter of Feasibility and a Quote.

5

Data Custodian approval

SA NT DataLink will seek Data Custodian approval for requested datasets on your behalf.

3

Finalise application

Finalise the application including data specifications and data flows. Sign Deeds of Confidentiality and relevant documents as required.

6

Data linkage and access

Once all approvals have been obtained, SA NT DataLink will commence linkage then extract linkage keys to Data Custodians. Each Data Custodian will release linkage keys and de-identified data to you via secure data transfer.
